## INFORMED CONSENT TO ESTABLISH AND PARTICIPATE IN STAFETTLOGGEN – THE RELAY COMPANION

I/we consent to a RELAY COMPANION being established

for ..... (child/student’s name)

The purpose of the consent is to establish a Relay Companion as a tool for efficient multi-agency collaboration for the child/student. The purpose is also to secure involvement of the parents/guardians and the child/student.

The Relay Companion’s log will essentially contain the measures that have been implemented for the child/student and the effects of these measures. For more information, see the next page.

The Relay Companion is established from ..... and ceases once its goal has been achieved or if the parents/guardians wish to end it.

BTI in BYN – Better multi-agency collaboration in Bindal and Ytre Namdal (BYN)

## Better multi-agency collaboration (BTI) – Relay Companion

An introduction for parents in the BYN municipalities.

In the BYN municipalities we attach a high priority to the welfare of children and young people. This is why we have launched our Better Multi-Agency Collaboration (BTI) initiative. BTI is intended to secure early and better multi-agency collaboration and parent cooperation.

As a parent/guardian you will always have a Baton Holder who will be your contact person. The Baton Holder is an employee who has regular contact with your child/student.

### What is a Relay Companion?

- A Relay Companion is an electronic record of measures and involved practitioners.
- It collates all implemented measures and evaluation time lines.
- The Relay Companion provides an overview of which services and which experts are involved and which tasks are assigned to individuals.
- The Relay Companion is intended to secure efficient handovers for you and your child/student.
- Once consent has been obtained, the Relay Companion is always prepared in collaboration with the affected person(s). Those covered by the consent can access and read the Relay Companion's log.
- NB: Students/young people over the age of 15 can give their own consent to the establishment of a Relay Companion.

### When does a Relay Companion start?

A Relay Companion is established when parents and the health clinic/kindergarten/school decides to take measures for the child/young person. The measures will relate to development areas where the child/student is expected to benefit from extra support for a short period or over time. Parents must grant written consent for the establishment of the Relay Companion. Consent must be re-obtained if multiple services are to be involved. Consent must also be obtained when the child/young person is transferred to another unit/service or moves to another municipality.

### When does a Relay Companion end?

The Relay Companion ends when you as parent together with other partners believe that the child/student is happy and that the measures have had the desired effect. As a parent you may end the Relay Companion's log at any time. When a log is ended, a printout will be made and stored in the child's/young person's records in the kindergarten/school, or with a public service if they are involved.

**Access to the electronic Relay Companion:**

The electronic document is stored online.

Enter the following URL in the address bar: <http://www.bynloggen.no>

Once you have opened the login page, log in using your Bank ID.

**Questions regarding the Relay Companion** should be directed to the kindergarten, school or public service you are collaborating with.
